

**Both of these raccoons are cute and fuzzy. Can you tell which one has rabies?\***

**\*You cannot tell if an animal has rabies by looking at it.**

**You can be exposed to rabies anywhere you encounter wildlife. It is good to enjoy nature, but you need to respect and understand it. Leave wild animals alone. Do not try to hand- feed them. Teach your children to do the same.**

**Do not touch sick, injured, or dead animals. If you need help, call a local animal control officer, police officer, game warden, park employee, health department official, or rabies control authority.**
